

# Professional Managed Services

asianfrontiers

www.asianfrontiers.com

Asianfrontiers' **Professional Managed Services** programme is a suite of services that delivers high-level expertise in the managing of day-to-day Internet operations to protect, secure and enhance the mission-critical Internet business for optimum performance.

## siteSecure. Mission-Critical Security

### siteSecure

secures, monitors and regulates web servers and network activity against potential security attacks and failures.

**siteSecure** is a full range of security solutions that combines firewall management, virtual private network integration, intrusion detection systems and security policy auditing. **SiteSecure** comprises:

- Managed firewall solutions – Watchguard, Cisco PIX, Checkpoint
- VPN
- Intrusion Detection Services
- Security Auditing Procedures
- Virus Scanning

## siteBalance. Load Balancing and Content Management

### siteBalance

optimizes server performance against high network traffic and server loads by ensuring high availability and failover protection, and in detecting failure and redistributing access requests over multiple network points.

Load balancing services with F5 or Foundry.

### siteBalance comprises:

- Managed Load Balancing
- SSL Acceleration Services

## siteBackup. Backup and Disaster Recovery

**siteBackup** customizes on and off-site backup procedures for disaster recovery purposes. **siteBackup** comprises:

- Tape Backup Services (Daily, Weekly, Monthly Rotations)
- Off-site Tape Storage
- CISCO Recall

## siteMonitor

Asianfrontiers' **siteMonitor** programme measures specific server port and URL responses at regular intervals. This ensures that both Asianfrontiers' and the customer are in constant awareness of server status.

## siteReport

Asianfrontiers' **siteReport** services deliver powerful and comprehensive cross-platform web reporting solution on the market, including web-based report management, multiple user support, continuous log analysis, support for multi-homed servers and customizable look and feel.

## siteAdmin

Asianfrontiers' team of system administration consultants has multi-platform expertise in assisting clients in troubleshooting, administrating and maintaining their server systems. Platforms supported include Solaris, Linux, BSDI, FreeBSD and Windows 2000.

## siteContent

Asianfrontiers' content delivery service solutions includes aggregated content feeds, global caching and delivery solutions and live multi-media streaming services.
